Voice Coil: 51 TSV

Magnet: 110\*60\*20 mm

Dimension: 114(D)\*105(D)mm

Color: Gray

A driver unit is a part of a horn loudspeaker, which are often used on sport fields etc. The driver unit is mounted on the rear of the horn loudspeaker. For maximal sensitivity remove the driver-unit from the horn, and hold the unit to your ear. The sound quality of a driver unit is very good.

Mounted on a horn the sound quality will decrease, the horn has not much bass response. For a good bass response the horn must have huge diameter and length.

With the driver unit mounted on the horn, a good loudspeaker reception is possible with crystal receivers.

Connected to my receiver set the living room is filled with background music from a local station. (120 kW station at 17km distance)

Connected (via a audio transformer) to my receiver set 1 the sound can outdoor be heard over a distance of more than 30 meter.

ZhenYu electric is a professional manufacturer and producer of driver unit. We have accumulated a wide range of clients and experience over the 15 years of our business. Our driver unit has already been exported to Europe, South America, Middle East, Southeast Asia, and Africa. We have clients in Mexico, Thailand, Russia, Algeria,

Philippines, Kazakhstan, Iran, Saudi Arabia, Nigeria, Singapore, Indonesia, Malaysia, The United Arab Emirates, South Africa, Australia, Brazil, and Sudan. High quality products and reasonable pricing is the pillar for us to gain the clients' recognition continually. At the same time, we keep researching and developing driver units more adaptable to the market demands to gain the recognition of more clients. We can also manufacture the products according to the clients' needs. If you need driver unit, please contact us without hesitation.
