

## **Steel Pipe Automatic Packing Machine**

The steel pipe automatic packing machine is researched and developed independently with proprietary intellectual property rights in our company. There are series of creative technologies such as automatic delivering steel pipes, unqualified pipe automatically leaving out of production line, automatic pipes aligning, automatic stacking pipes, and automatic outputting the pipes and so on. This packing machine solves the many problems in the client's plant with the following advantages: saving labor power, lowering the production cost, reducing the labor tension, releasing the casualty and so on. Besides, this packing machine is used conveniently and easily maintained.

The steel pipe automatic packing machine is the patented product, which copying is not allowed. If any, our company has the right to protect our right by the law or court.
